Contents of Volume 20

No. 1

R.F. Cook, R. Sinclair and J.A. Mumford (U.K.)
Detection of influenza nucleoprotein antigen in nasal secretions from horses infected with A/equine influenza (H3N8) viruses (JVM 00705) 1

F. Vlaspolder, C.A. Kraaijeveld, T. Oosterlaken, R. van Buuren, B.J. Benaissa-Trouw and H. Snippe (The Netherlands)
Discrimination of determinant specificity of two encephalomyocarditis virus neutralizing monoclonal antibodies by competition, mixed neutralization and anti-idiotypic antibodies (JVM 00706) 13

J.C. Zwaagstra, G.D. Armstrong and W.-C. Leung (Canada)
The use of lectin affinity columns for selection of precursor or fully glycosylated forms of glycoprotein gD1 of herpes simplex virus type 1 (JVM 00707) 21

G.P. Richards, J.A. Bemiss and J.D. Sample (U.S.A.)
A simple planimetric method to quantify cytotoxicity in cell culture monolayers (JVM 00708) 33

N. Pyndiah, R. Béguin, J. Richard, M. Charles, A. Rey and V. Bonifas (Switzerland)
Accuracy of rotavirus diagnosis: Modified genome electrophoresis versus electron microscopy (JVM 00709) 39

P. Juto and B. Settergren (Sweden)
Specific serum IgA, IgG and IgM antibody determination by a modified indirect ELISA-technique in primary and recurrent herpes simplex virus infection (JVM 00712) 45

S. Thompson, R.S.S. Fraser and K.L. Barnden (U.K.)
A beneficial effect of trypsin on the purification of turnip mosaic virus (TuMV) and other potyviruses (JVM 00713) 57

D.R. Harper, H.O. Kangro, S. Argent and R.B. Heath (U.K.)
Reduction in immunoreactivity of varicella-zoster virus proteins induced by mycoplasma contamination (JVM 00714) 65

L.O. Magnius, L.H. Saleh, T. Vikerfors and H. Norder (Sweden)
A solid-phase reverse immunosorbent test for the detection of enterovirus IgM (JVM 00715) 73

I. Millman and R. Grob Glass (U.S.A.)
The hybrid EIA test: A specific and sensitive assay for the detection of woodchuck antibody to hepatitis surface antigen (anti-WHs) (*Short Communication*) (JVM 00710) 83

Y.S. Lee (U.S.A.)
A comparison of reverse transcriptase and antigen capture assays for the detection of HIV (*Short Communication*) (JVM 00711) 89

No. 2

C.T. Mavromoustakis, D.T. Witiak and J.H. Hughes (U.S.A.)
Effect of rolling on foci development and viral replication for herpes simplex virus (HSV) (JVM 00720) 95

F. Bélanger, R. Alain, P. Payment, J. Lecomte and M. Trudel (Canada)
Rapid titration of bovine, caprine and human RS virus by a micro-immunoperoxidase assay using a monoclonal antibody and a permissive ovine kidney cell line (JVM 00716) 101

G.L. Woods, M. Yamamoto and A. Young (U.S.A.)
Detection of adenovirus by rapid 24-well plate centrifugation and conventional cell culture with dexamethasone (JVM 00717) 109

D.S. Healey, W.J. Maskill, E.V. Neate, F. Beaton and I.D. Gust (Australia)
A preliminary evaluation of five HIV antigen detection assays (JVM 00718) 115

D.R. Fipps, J.D. Damato, D. Brandt and D.S. Burke (U.S.A.)
Effects of multiple freeze thaws and various temperatures on the reactivity of human immunodeficiency virus antibody using three detection assays (JVM 00721) 127

P.R. Stirk and P.D. Griffiths (U.K.)
Comparative sensitivity of three methods for the diagnosis of cytomegalovirus lung infection (JVM 00724) 133

R.B. Ferns, R.S. Tedder and J. Loyd Donoghue (U.K.)
Comparison of a monoclonal anti-HIV 1 *gag* solid phase with a polyclonal anti-HIV solid phase for detecting anti-HIV 1 in a competition ELISA (JVM 00722) 143

T.F. Schwarz, M. Roggendorf and F. Deinhardt (F.R.G.)
Human parvovirus B19: ELISA and immunoblot assays (JVM 00723) 155

D.R. Dahling and B.A. Wright (U.S.A.)
Optimization of a suspended cell method and comparison with cell monolayer technique for virus assays (JVM 00725) 169

S.S. Kalter, R.L. Heberling, C.L. Coe and A.R. Rodriguez (U.S.A.)
The collection of blood on filter paper and its use in the dot-immunobinding assay (DIA) for detection of antibody (*Short communication*) (JVM 00719) 181

No. 3

T. Candresse, G. Macquaire, M. Monsion and J. Dunez (France)
Detection of Chrysanthemum stunt viroid (CSV) using nick translated probes in a dot-blot hybridization assay (JVM 00726) 185

G.A. Robertson, B.M. Kostek, W.A. Schleif, J.A. Lewis and E.A. Emini (U.S.A.)
A microtiter cell-culture assay for the determination of anti-human immunodeficiency virus neutralizing antibody activity (JVM 00727) 195

J. Hammond and R.H. Lawson (U.S.A.)
An improved purification procedure for preparing potyviruses and cytoplasmic inclusions from the same tissue (JVM 00729) 203

369

M.J. Nelles, L. Taylor, S. Filer, R. Wellerson, C. Haberzetti, A. Sito and J.E. Geltosky (U.S.A.)
Detection of antibody to hepatitis B core antigen (anti-HBc) using a direct (antiglobulin) format and development of a confirmatory assay for anti-HBc (JVM 00730) 219

D. Larzul, F. Guigue, J.J. Sninsky, D.H. Mack, C. Bréchot and J.-L. Guesdon (France, U.S.A.)
Detection of hepatitis B virus sequences in serum by using in vitro enzymatic amplification (JVM 00731) 227

H.A. Cubie and M. Norval (U.K.)
Synthetic oligonucleotide probes for the detection of human papilloma viruses by in situ hybridisation (JVM 00732) 239

R.E. Unger, R.Y. Chuang, B.I. Osburn and R.H. Dol (U.S.A.)
Colony hybridization using nylon membranes and RNA probes – an improved method for screening bacterial clones containing bluetongue virus genome (JVM 00734) 251

W.A. Cafruny and D.E. Hovinen (U.S.A.)
The relationship between route of infection and minimum infectious dose: studies with lactate dehydrogenase-elevating virus (*Short Communication*) (JVM 00735) 265

R. Stute (F.R.G.)
Comparison in sensitivity of 10 HIV antibody detection tests by serial dilutions of Western blot-confirmed samples (*Short communication*) (JVM 00733) 269

No. 4

C.A. Pujol, C.A. Feledi and E.J. Massouh (Argentina)
Coupling of foot-and-mouth disease virus to sheep red blood cells using tannic acid for immunological assays (JVM 00728) 275

B. Kournikakis and J. Fildes (Canada)
Titration of avirulent Newcastle disease virus by the plaque assay method (JVM 00736) 285

D.J. Witt and E.B. Bousquet (U.S.A.)
Comparison of enteric Adenovirus Infection in various human cell lines (JVM 00737) 295

R. Pauwels, J. Balzarini, M. Baba, R. Snoeck, D. Schols, P. Herdewijn, J. Desmyter and E. De Clercq (Belgium)
Rapid and automated tetrazolium-based colorimetric assay for the detection of anti-HIV compounds (JVM 00738) 309

G.R. Barnett, G.A. Tannock, J.A. Paul and D.A. Bryce (Australia)
An improved membrane-filtration enzyme immunoassay for the rapid serological diagnosis of viral infections (JVM 00739) 323

M. Musiani, M. Zerbini, G. Gentilomi and M. La Placa (Italy)
Rapid quantitative assay of cytomegalovirus infectivity (JVM 00740) 333

W.M. Schnitzlein, N. Ghildyal and D.N. Tripathy (U.S.A.)
A rapid method for identifying the thymidine kinase genes of avipoxviruses (JVM 00741) 341

C.A. Dangler, S.J. Dunn, K.R.E. Squire, J.L. Stott and B.I. Osburn (U.S.A.)
Rapid identification of bluetongue virus by nucleic acid hybridization in solution (JVM 00742) 353
